## Public Art

### 6. the friendly python

Keep an eye out for a very friendly Amethystine Python who watches over the grounds of the Botanic Gardens at Nature's Powerhouse. This 6.5 metre-long sculpture is expertly carved out of Cooktown Ironwood, a species which is one of the hardest and densest timbers in the world.

It's very easy to fall in love with this very sleek, smooth sculpture...a great photo opportunity.

### 7. river of life

Take a meander along Cooktown's scenic foreshore to discover the beautiful artworks that combine to form the River of Life Walkway. At 500 metres long the winding pathway features hand-painted and carved ceramic tiles that depict the diversity of Cooktown's present-day identity, contrasted against that of its cultural history.

### 8. milbi wall

Nearly 500 hand-painted and carved tiles adorn the 12 metre long curved Milbi Wall interpretive sculpture, placed at the very location where in 1770, Captain James Cook and his crew first set foot on land. Constructed in three sections, this reconciliation wall explains in both image and text the Creation Stories and how the Endeavour River and Cooktown were made. Don't rush by this sculptural book, take time to enjoy the beautiful art and unravel its stories!

## Art in the Park

### 10. grassy hill

In 2010 a major re-development project enhanced Grassy Hill with improved access, new recreation facilities, public artworks and disabled access in the shape of a serpent winding up from the car park to the lighthouse. Don't miss the 360 degree views from this iconic landmark!
